**SAFETY RUBBER PRODUCTS
FOR PLAYGROUNDS
AND RECREATION AREAS**

RUBBER SAFETY TILES — joyful and harmless play

Safety surfacing is essential on every children's playground. RUBRIG safety tiles are connected with pins which are engineered to keep the tiles together even in hardest conditions. Our tiles are crack free, water and frost proof, slip-resistant and water permeable, easy-to-install and to-clean. We use our own innovated RUBRIG tiles bottom cushioned construction that ensures high level of shock-absorbance resulting in high HIC values and comfort under the feet. RUBRIG safety tiles are EN 1177 certified and it guarantees the highest safety standards on playgrounds.

Sizes available for tiles: 0,5x0,5 m; 0,5x1 m; 1x1 m; thickness: 15–100 mm; edge and corner elements available in size of 0,5x0,5 m

We have several product versions:

- **SBR Version** – black recycled SBR rubber + colored SBR top in red, green, blue and grey, bounded by MDI polyurethane binder.
- **EPDM Version** – black recycled SBR rubber base, covered with a EPDM rubber available in 24 colors top layer, bounded by a clear MDI polyurethane binder.
- **Design Version** – design patterns applied on any Basic or Virgin EPDM rubber version.

URBAN AND PLAYGROUND DESIGN ELEMENTS

RUBRIG spheres, hemispheres, cubes and design elements are available in various colors for playgrounds and parks as playing surface or seating.

They can be mounted on an anchor in subbase or glued on safety tile surface.

Sizes available for cubes: 400x400x400 mm, 500x500x500 mm and 600x600x600 mm.
Available sizes for spheres and hemispheres: Ø 350 mm, Ø 500mm and Ø 700mm.

RUBRIG is offering four authentic design patterns allowing interiorists successfully integrate resilient flooring into common design concepts of modern sport and fitness objects.

CRACKED EARTH

We are used to walk on earth, we are ready to touch it with bare feet. It is the backbone of everything and something we want to protect ...

SUN TREE

The symbol of understanding of the past, the present and the future. The knowledge of our ancestors, of ourselves, of our children.

VIEWPOINT

Saturated geometry, the accuracy of interlocking lines rhythmically curving around the centre creating an optical illusion.

WAVE

A trace of a wave in the sand, a pattern of a sea-bed along the plunge line, memory of a breeze, a trace of wind and joy of a holiday.
